

At Alliance Geotechnical, we believe our responsibility to maintain a sustainable business includes not only minimising resource use, but also protecting the environment. After all, what we do and what we use today, should not compromise future generations.

We also understand some of our activities and services can impact the environment and we actively seek to minimise this impact in our day-to-day operations, and in the process, continually improve our Environmental Management System.

Our environmental objectives include the reduction of waste by recycling wherever possible, minimising disturbance of flora and fauna, and reducing energy usage via smart technology.

Senior Management are responsible for ensuring that our accredited ISO 14001 Environmental Management System will not only comply with relevant legislation, acts and codes, but also provide the framework for implementing and monitoring our environmental objectives and targets. We are also committed to continually improving the EMS and preventing Pollution.

This policy, and all related Environmental procedures, are available to employees via the Integrated Management System.
