

The Senior Management of Alliance Geotechnical commits itself to maintaining a Quality Management System which ensures that the Laboratory services it offers are fit for their intended purposes in accordance with the requirements of ISO 17025 *General requirements for the competence of testing and calibration laboratories*.

Furthermore, the company states its commitment to meeting customers stated and implied needs impartially. We will do this through a process of continual improvement of all our services, having checks and balances in place, developing and maintaining formal processes, and the implementation of ISO 9001 Quality Management System.

The Senior Management of Alliance Geotechnical fully understands the importance of impartiality in undertaking its laboratory activities and will not allow commercial, financial or any other pressures to compromise impartiality.

This commitment shall be achieved by:

- Determination and demonstration of compliance to statutory and regulatory requirements.
- Identification of risks to impartiality that may arise from our laboratory activities or relationships.
- Allocation of resources and provision of necessary information required for managing interrelated processes and activities throughout the company.
- Commitment to the company's confidentiality arrangements which ensures that no staff undertakes laboratory activities where a conflict of interest may exist.
- Ongoing review of the performance and continuing suitability of Quality Management System.
- Continual improvement
- Ensuring that Laboratory Reports are issued only after peer review by a competent person.

Simon Thomas
Managing Director
