

# Kings Central

**Location**  
Werrington

**Client**  
Western Earthmoving (WEM)

**Timeframe**  
Apr 2023 – Nov 2023

- Scope**
- ✓ Geotechnical
  - ✓ Environmental
  - ✓ Testing

The \$300 million Kings Central development in Werrington will comprise more than 300 single- and double-storey turnkey homes, built around internal parkland plus an industrial precinct.

Lendlease is developing the 28ha site which is located within walking distance to Werrington Train Station and a few minutes' drive to the Great Western Highway.

Alliance has been working closely with Western Earthmoving (WEM) to carry out geotechnical consulting and testing of earthworks for service areas, roadworks and property lots.

With the use of Toddler, our ute-mounted drill rig, our geotechnical engineers can carry out investigations quickly and cost-effectively. Perfect for non-coring investigations, Toddler can move around quickly to carry out multiple bore-holes in a timely manner.

Alliance conducted third party review of material classification reports, on behalf of the client, and provided advice and/or approval for importation of materials to site.
