

Parramatta Light Rail – Stage 1

Location

Parramatta, Westmead, Carlingford

Client

CPB Downer Joint venture

Timeframe

Oct 2020 – Jan 2023

Alliance Revenue

\$3.8M

Overall Project Value

\$2.4B

Scope

- ✓ Geotechnical
- ✓ Environmental
- ✓ Testing

Parramatta Light Rail is one of NSW Government's latest major infrastructure projects, connecting Westmead and Carlingford with a two-way track spanning 12 kilometres through Camellia and the Parramatta CBD.

The project presented numerous environmental challenges, due to historical land uses and the proximity to numerous and sensitive environmental receptors throughout the rail corridor.

Alliance provided consultancy support services to the primary contractor and their subcontractors across the project.

The scope of services provided included:

- Material/waste classifications
- Groundwater monitoring well installation and monitoring events
- Acid sulfate soil assessments
- Occupational hygiene services.
